Kat's Leak Analysis by Water Provider & Text Analysis of Water Detection Type

Purpose

- The purpose of this file is to explore the HB1051 data with emphasis on water leakage. The data can be found http://cowaterefficiency.com/unauthenticated_home (http://cowaterefficiency.com/unauthenticated_home) with permission. Once in the portal, all report years (2013-2017) were selected as well as all water providers.
- Section 1.0 is clean up, section 2.10 is analysis.

1.0 Reading in Data

- The following files were used:
    - overview.csv
    - normalizing_03_population.csv - was initially merged for population, but ultimately not used.
    - foundational_09_balance_data.csv

```
#read in data
overview <- read.csv("EffDataPortal_Output_User690_20181112192716//overview/overview.csv", stringsAsFactors = FALSE)

normalizing_pop <- read.csv("EffDataPortal_Output_User690_20181112192716/normalizing/normalizing_03_population.csv", strings
AsFactors = FALSE)

foundational_09_balance_data <- read.csv("EffDataPortal_Output_User690_20181112192716/foundational/foundational_09_balance_d
ata.csv", stringsAsFactors = FALSE)

head(overview, n=10)

1.0 Merging Overview & Normalizing_Pop on ce_annual_ndx & Foundational_09 balance data (to get water provider town name)

- ce_annual_ndx represents the unique water provider that is unique for each provider per year of reporting (which means Denver will have as many ce_annual_ndx numbers as years reported)

- Overview & Normalizing are merged first on ce_annual_ndx, then merged with foundational_09_balance_data on the same variable
- Percentage of Water loss is calculated from the resulting file as calculated_lossS / distributed_watS
- There are about 46 towns where metered water is NA which results in a non-useable percLoss
- Lafayette for 2015, 2016 had no distributed water loss

```
### ce_index is unique for water provider
### ce_annual_ndx is unique for year and provider

- The following water providers may have errors in reporting because their metered water is much greater than their distributed water. These were removed from the visualizations below
  - Little Thompson - 2014-2017
  - Pueblo - 2013
  - Lafayette - 2013
  - Louisville - 2017

- 31 rows were removed, see excel chart for which water providers and years
